The screenshot shows the HackMD interface. On the left, there's a dark sidebar with various buttons for file operations like 'New!', 'Share', and 'Power'. Below this is a list of note titles. The main area has a note titled '# Put your note title here' with content about note titles and a thought. It also shows GitHub integration options and template suggestions.

## Start a note

The image shows a HackMD session with two panes. The left pane is a code editor displaying an MD file with a red arrow pointing to the word "visualisation". The right pane is the visualized version of the same content.
